

GLOBAL AMR R&D HUB

The **Global AMR R&D Hub** was established following a call from G20 Leaders to address challenges and improve coordination and collaboration in global AMR R&D using a One Health approach.

The Global AMR R&D Hub is a global partnership currently consisting of 17 countries, the European Commission and two philanthropic foundations and is steered by a Board of Members. Its goals are to support global priority setting and evidence-based decision-making on allocation of resources for AMR R&D through the identification of gaps, overlaps and potential for cross-sectoral collaboration and leveraging in AMR R&D. To achieve these, the Global AMR R&D Hub collects, analyses and presents information on AMR R&D investments, products and market interventions. As the key knowledge centre for AMR R&D, the work of the Hub is strategically aligned into three key pillars that encompass (1) guiding and supporting evidence-based decision-making; (2) enhancing collaboration and coordination; and (3) promoting awareness, knowledge and visibility in the field. More information is available at www.GlobalAMRHub.org.

A secretariat in Berlin started operations in September 2018. The Secretariat has built up and manages the Global AMR R&D Hub under the guidance of the Board of Members. The Secretariat currently has 5 full-time employees. The Secretariat administratively belongs to the German Center for Infection Research (DZIF). We therefore offer the exciting opportunity for a

Head of the Global AMR R&D Hub Secretariat (m/f/d)

Starting date: 1st September 2022
